The Company's outstanding share position as at October 31, 2017, is 2,831,410 common shares, and the Company has no share purchase warrants or incentive stock options currently outstanding.

SUBSEQUENT EVENTS

On October 6, 2017, Mr. Hugh Rogers resigned as Chief Executive Officer and a director of the Company, and was subsequently replaced by Mr. Giuseppe (Pino) Perone. Mr. Perone now serves as Chief Executive Officer, Corporate Secretary and a director of the Company.

On October 20, 2017, the Company consolidated the outstanding share capital of the Company on the basis of two (2) pre-consolidation common shares for one (1) post consolidation common share.

CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support future business opportunities. The Company defines its capital as shareholders' equity, loans and advances payable. The Board does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

COMPETITION

Competitors for acquisition opportunities include well-capitalized companies, independent companies and other companies having financial and other resources far greater than those of Coronado, thus a degree of competition exists between those engaged in acquiring attractive assets.

CRITICAL ACCOUNTING ESTIMATES

The preparation of the Company's condensed consolidated interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities and contingent liabilities at the date of the condensed consolidated interim financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

CHANGES IN ACCOUNTING POLICIES

Certain pronouncements were issued by the IASB or the IFRIC, but not yet effective as at August 31, 2017. The Company intends to adopt these standards and interpretations when they become effective. The Company does not expect these standards to have an impact on its financial statements. Pronouncements that are not applicable to the Company have been excluded from those described below.

The following standards or amendments are effective for annual periods beginning on or after March 1, 2018:

1) IFRS 9 – Financial Instruments (annual periods beginning March 1, 2018)

PROPOSED TRANSACTIONS

The Company has no proposed transactions that have not been disclosed.

FINANCIAL INSTRUMENTS

The Company's financial instruments are exposed to the following risks:

Credit Risk

Credit risk is the risk of financial loss to the Company if counterparties do not fulfill their contractual obligations.

Cash and cash equivalents consist of cash bank balances and short-term deposits. The Company's short-term investments are held with a Canadian chartered bank and are monitored to ensure a stable return. The Company's short-term investments currently consist of term deposits as it is not the Company's policy to utilize complex, higher-risk investment vehicles.

The carrying amount of accounts receivable and cash and cash equivalents represents the maximum credit exposure. The Company does not have an allowance for doubtful accounts. As at August 31, 2017, there were no significant amounts past due or impaired.

Market Risk

Market risk is the risk that changes in foreign exchange rates and interest rates will affect the Company's cash flows, net income and comprehensive income. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its purchases and capital commitments, and other financial obligations as they are due. The Company's approach to managing liquidity is to ensure, to the extent possible, that it will have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking harm to the Company's reputation.

The Company's liquidity is dependent upon maintaining its current working capital balances, operating cash flows and ability to raise funds. To forecast and monitor liquidity, the Company prepares operating and capital expenditure budgets which are monitored and updated as considered necessary. Considering these circumstances and the Company's cash balance liquidity risk is assessed as low.

Foreign Exchange Risk

The Company currently does not have significant exposure to other currencies and this is not expected to change in the foreseeable future as the capital commitments that are expected to be carried out in United States dollars will be limited.

Interest Rate Risk

The Company is exposed to interest rate risk on its cash and cash equivalents. The majority of these deposits have been in discounted instruments with pre-determined fixed yields. Interest rate movements will affect the fair value of these instruments so the Company manages maturity dates of these instruments to match cash flow needs, enabling realization at no loss in almost all cases.

Fair Value of Financial Instruments

The fair value of the Company's financial assets and liabilities approximates the carrying amount. Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The fair value classification of the Company's financial instruments are as follows:

		August 31, 2017		February 28, 2017	
	Fair Value Level	Fair value through profit or loss	Loans and receivables and other financial liabilities at amortized cost	Fair value through profit or loss	Loans and receivables and other financial liabilities at amortized cost
		$	$	$	$
Financial assets:					
Cash and cash equivalents	1	1,402,751	-	1,463,241	-
Restricted cash		-	11,642	-	11,601
Shares receivable		-	109,680	-	106,235
		1,402,751	121,322	1,463,241	117,836
Financial liabilities:					
Accounts payable and accrued liabilities		-	15,747	-	50,167
		-	15,747	-	50,167

The Company's cash and cash equivalents are classified as level 1. During the six month period ended August 31, 2017 and the year ended February 28, 2017, there were no transfers between level 1, level 2 and level 3.

RISKS

The Company has no active business. The Company has adequate cash for its current obligations, but may not have sufficient cash to sustain operations indefinitely. With limited financial resources and no revenue, there is no assurance that future funding will be available to the Company to pursue future endeavours. There is a risk that the Company could be forced to cease operations and become insolvent.

There is no guarantee that the Company will be able to attract interest to participate in an acquisition or another business opportunity. As the Company no longer owns any significant assets and without a business or sufficient capital, the Company's common shares have been downgraded to the NEX board of the TSX-V. There can be no assurance that an active and liquid market for the Company's securities will develop and shareholders may find it difficult to resell the securities of the Company.

Coronado's management believes that the foregoing risks and uncertainties are a fair indication of the risks and uncertainties material to Coronado's business; however, additional risks and uncertainties, including those currently unknown to Coronado or not considered to be material by Coronado, may also adversely affect the business of Coronado.

OFF-BALANCE SHEET ARRANGMENTS

As part of the terms of the sale of Opunake Hydro Limited ("OHL"), the Company guaranteed a debt of NZ$348,650 from OHL owing to a subsidiary of TAG Oil Ltd. As at August 31, 2017, the debt was paid in full.

All transactions and balances are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

7. FINANCIAL INSTRUMENTS RISK

The Company's financial instruments are exposed to the following risks:

Credit Risk

Credit risk is the risk of financial loss to the Company if counterparties do not fulfill their contractual obligations.

Cash and cash equivalents consist of cash bank balances and short-term deposits. The Company's short-term investments are held with a Canadian chartered bank and are monitored to ensure a stable return. The Company's short-term investments currently consist of term deposits as it is not the Company's policy to utilize complex, higher-risk investment vehicles.

The carrying amount of accounts receivable and cash and cash equivalents represents the maximum credit exposure. The Company does not have an allowance for doubtful accounts. As at August 31, 2017, there were no significant amounts past due or impaired.

Market Risk

Market risk is the risk that changes in foreign exchange rates and interest rates will affect the Company's cash flows, net income and comprehensive income. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its purchases and capital commitments, and other financial obligations as they are due. The Company's approach to managing liquidity is to ensure, to the extent possible, that it will have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking harm to the Company's reputation.

The Company's liquidity is dependent upon maintaining its current working capital balances, operating cash flows and ability to raise funds. To forecast and monitor liquidity, the Company prepares operating and capital expenditure budgets which are monitored and updated as considered necessary. Considering these circumstances and the Company's cash balance liquidity risk is assessed as low.

Foreign Exchange Risk

The Company currently does not have significant exposure to other currencies and this is not expected to change in the foreseeable future as the capital commitments that are expected to be carried out in United States dollars will be limited.

7. FINANCIAL INSTRUMENTS RISK *(Continued)*

Interest Rate Risk

The Company is exposed to interest rate risk on its cash and cash equivalents. The majority of these deposits have been in discounted instruments with pre-determined fixed yields. Interest rate movements will affect the fair value of these instruments so the Company manages maturity dates of these instruments to match cash flow needs, enabling realization at no loss in almost all cases.

Fair Value of Financial Instruments

The fair value of the Company's financial assets and liabilities approximates the carrying amount. Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The fair value classification of the Company's financial instruments are as follows:

		August 31, 2017		February 28, 2017	
	Fair Value Level	Fair value through profit or loss	Loans and receivables and other financial liabilities at amortized cost	Fair value through profit or loss	Loans and receivables and other financial liabilities at amortized cost
		$	$	$	$
Financial assets:					
Cash and cash equivalents	1	1,402,751	-	1,463,241	-
Restricted cash		-	11,642	-	11,601
Shares receivable		-	109,680	-	106,235
		1,402,751	121,322	1,463,241	117,836
Financial liability:					
Accounts payable and accrued liabilities		-	15,747	-	50,167
		-	15,747	-	50,167

The Company's cash and cash equivalents are classified as level 1. During the six month period ended August 31, 2017 and the year ended February 28, 2017, there were no transfers between level 1, level 2 and level 3.

8. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support future development of the business and maintaining investor, creditor and market confidence.

The Company defines its capital as shareholders' equity and working capital. The Board of Directors does not establish a quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. In the event that adjustments to the capital structure are required, the company may consider issuing additional equity, raising debt or revising its capital investment programs.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements or restrictions. The Company has not paid or declared any dividends since the date of incorporation, nor are any contemplated. The Company may require equity issues to cover administrative and operating cost.

9. SUBSEQUENT EVENTS

On October 6, 2017, Mr. Hugh Rogers resigned as Chief Executive Officer and a director of the Company, and was subsequently replaced by Mr. Giuseppe (Pino) Perone. Mr. Perone now serves as Chief Executive Officer, Corporate Secretary and a director of the Company.
