## NEWS RELEASE

Trading Symbol: CRD – TSX-V

News Release Date: June 30, 2009

### Copper Shipments Made

Coronado Resources completed two shipments of copper mineralization to China in April and May. The shipments comprised nearly 915 metric tons (1009 short tons) of mineralized material grading approximately 24% cu. Net proceeds are expected to be approximately \$380,000, which will be used to pay previous advances from the Metals Broker and the excess to be used in the continuing development of the Madison Property. Final confirmation of grade weights and net proceeds are expected within the month.

Assays reported above are processed in Norris Labs, a local Montana lab, using the wet copper iodide A1 precipitation method, and are compared with the Metals Brokers independent lab before final settlement. Norris Labs is not registered by the International Standards Organization; they are used due to proximity and quick turn-around results. Eugene Larabie P. Eng., is the “qualified person” overseeing the project. For more information please visit the company’s website at [www.coronadoresourcesltd.com](http://www.coronadoresourcesltd.com).

On Behalf of the Board

“Eugene Larabie”

Eugene Larabie, President
